

Best Practice – 2

1. Title of the Practice: Distribution of free Books, Bags and donation.

2. The context that required the initiation of the practice (100 – 120 words).

Our TRR Government Degree College is a one of the prestigious institution started in the year 1966 to cater the needs of the local rural and especially weaker sections of the society. Most of our students are first generation learners. The parents of the students are daily agriculture labors who strive very hard for the education of their students. Some students are working for their families as extra working hands for their family. Under such circumstances paying fee, buying books bags and uniform become burdensome for these low income family of our students. Keeping this point in view our college Principal and staff started helping our students to reduce their financial burden to certain extent. This is age old practice of our college to help our poor students as financial problems should not hinder their interest in studies.

3. Objectives of the practice (50 – 60 words)

- 1. To extend our helping hand to students to come out of the financial problems.**
- 2. To improve the active participation of the students**
- 3. To improve the understanding between teaching and student community**
- 4. To improve the sense of helping nature among staff and students**
- 5. To inculcate moral and social responsibility among staff and students**

4. The Practice (250-300 words)

It's an age old practice of our college to help the financially poor students whose parents income is not sufficient to support their studies. The list of poor students is roughly prepared immediately after our door to door campaigning of our teaching staff for admissions. We think that this is the right method of tracing out the financially poor students as we directly see and interact with their parents and analyze their financial status. Through ward Counseling our Ward counselors will understand the problems of our students and bring this to the kind notice of our principal. The principal with the help of Staff Council will finalize the students who are poor and needy. The working staff members, retired Principals of our college extend their helping hands financially to fulfill the needs of the poor students. Every year many students of our college gets benefited by the donations made by the staff members and local people in the form of distributing free uniforms, college bags, lunch boxes, and paying fee for financially poor students.

5. Obstacles faced if any and strategies adopted to overcome them (150 – 200 words)

The two problems faced in this best [practice are

1. Tracing out the true poor students from total number of students
2. limited recourses/funds to help the huge list of students.

Door to door campaign for admission is a boon to understand the students standard of life. Apart from this our well organized ward counseling system help us in preparing the list of extremely poor needy students.

The second problem of limited funds/ recourses can be resolved by involving and motivating all the staff members as well as local public to extend their part of help, as we all are living in the responsible society

6. Impact of the practice (100 – 120 words)

This impact is tremendous as the understanding between the students and teaching staff has increased a lot. More over a sense of satisfaction of millions worth can be gained through small donations. As a teacher we are inspiring students to walk in the right path. What we do today, tomorrow our students will replicate it. As a teacher we are not only imparting knowledge but also making responsible citizens in the class room. We strongly believe that the Knowledge without social responsibility is nothing.

LIST OF STUDENTS WHO GOT BENIFITED

S.No	Name of the student	Group/Year	Mobile No
