Objectives of Prawn Processing:

Prawn Processing involves , preparing Prawn and seafood for delivery to consumers. Once the prawn is harvested it must undergo several steps before it read to be sold in the market. The process includes gutting ,filleting and packaging of the product. Prawn is a highly perishable food so it must be carefully handled from the moment caught un till it is sealed in packing material . Proper , efficient processing and packing prevent deterioration and ensure a quality product.

Prawn Processing involves the following steps

- **Sorting Prawn by Size**
- **Manually heads are removed**
- **Moving prawns in to a cleaning machine maintained water PH at 4**
- **Grading**
- **Freezing at -40⁰C**
- **Packing**
